

Vanish...

The cannula that feels like nothing at all.

Adult Nasal Cannula

Vanish latex-free nasal cannulas offer a new level of irritation-free ear and facial comfort. Over-the-ear side tubes are made with Silimer, a material science breakthrough with a soft and lightweight formula that mimics the comfort properties of silicone. The new ear tubes are coupled with soft nasal prongs curved to promote comfortable alignment of the cannula on the user's face. The supply line features internal ribbing to resist kinking and ensure uninterrupted flow. Vanish is available with a 2-foot or 7-foot supply line.

Vanish's Benefits Are All About Your Comfort

It's no wonder that once you try **Vanish** for a few days, you won't want to ever go back to a conventional cannula. That's because there's a world of features and attention to user needs in everything from the Vanish's materials to its design.

- Silimer ear tubes mimic silicone softness and flexibility
 - Skin friendly for maximum comfort
 - Reduces ear and facial irritation
- Molded nasal prongs
 - Soft & pliable to reduce nose irritation
 - Curved to align naturally on users face
 - No irritating flap required
- Supply line is safety tubing with internal ribbing
 - Resists kinking
 - Ensures uninterrupted flow
